

# Global Transportation Expense Management

Cass is the leading global provider of freight audit, payment and real-time supply chain intelligence services.

## Ship Globally - View Locally!

By definition, international shipping is complex! By industry performance, Cass is the global leader in delivering customized freight payment and audit solutions for companies with complex logistics networks and requirements.

Over more than fifty years, we have developed a deep expertise in processing, paying and auditing complex cross-border transportation invoices. For you, this translates to a reliable, best practice solution. In addition, you now enjoy normalized worldwide freight spend data in a single repository for every dollar (Euro or Yuan) of transportation spend.

Cass' expert systems do all of this for you. We receive freight invoice data, transfer to electronic format (as needed), and audit and pay according to your rules – for all transport modes and any global logistics service provider.

You then enjoy a clear, standardized, and granular view of your costs – at the line item level. Monitoring KPI metrics and cost drivers in real-time is keystrokes away! Customized reports can be pulled from a single view of your entire global shipping activity and then benchmarked against the world's largest repository of global transportation data.

### Rely on Cass as your Global Expert

Cass has been processing international freight invoices for over 20 years. Imagine introducing world class best practices into your freight payment processes today. Now you can utilize an expert system to reduce your invoice processing costs, eliminate billing overpays and receive standardized data to power business intelligence to fuel global supply chain improvements!

These benefits can only be realized with a proven methodology forged by years of practice. Experience earned from expertly processing:

- **\$2.4 billion in international freight invoices paid in 2010**
- **1.7 million cross-border freight invoices in 2011**
- **Payment in any currency**

## The Cass Global Solution

Using our expert global business system, you will:

- Achieve faster visibility to critical supply chain cost drivers.
- Gain accurate pre-invoice rating for every international shipment, any mode!
- Reduce carrier overpayment, processing and post-audit costs.
- Receive quick and easy vision to accurate invoice accrual data.
- Acquire a single version of the truth: One portal = a single location for all global logistics-related activity.
